Help clean up Hanford

Give your opinion to the
Washington State Department of Ecology, U.S. Department of Energy,
and U.S. Environmental Protection Agency

TANK MILESTONE REMOVED

You are invited to comment on the proposal to remove the dates for the construction of additional double-shell waste storage tanks in the Tri-Party Agreement. The agencies believe safety improvements; waste reduction; and proposed pipeline construction will allow the safe storage of Hanford's tank waste in the site's existing tanks until at least October 2003. A 45-day public comment period on the proposed TPA milestone change will end Sept. 21, 1995. *For more information or to submit written comments, contact Robert Harper, Department of Ecology, Nuclear Waste Program, P. O. Box 47600, Olympia, WA 98504-7600.*

The draft agreement and proposed plan are also available for review and copying at the following Hanford Information Repository:

Portland State University, Branford Price Millar Library, 934 SW Harrison, Portland, OR 97207-3690, (503) 725-3690.

If you have special accommodation needs or would like this material in an alternative format (large type, Braille, cassette tape, or on computer) please contact Michelle Davis at (360) 407-7126 (Voice) or (360) 407-6206 (TDD).

GROUNDWATER CLEANUP

The TPA agencies invite your comment on the Interim Remedial Measures Proposed Plan for the 200-UP-1 Operable Unit at the Hanford Site. The unit, located about 25 miles northwest of Richland, contains groundwater contaminated with radioactive and chemically hazardous materials. The plan's preferred alternative proposes to pump out contaminated groundwater, treat it, and return it to the ground. A 30-day comment period on the proposed plan will end Sept. 6, 1995. *For more information or to submit written comments, contact Dib Goswami, Department of Ecology, Nuclear Waste Program, 1315 W. 4th Avenue, Kennewick, WA 99336.*
